

Valuation memo · Harbor platform (8 March 2026)

Prepared for Brightwave Software BV.

Conclusion: the Harbor software and IP are valued at EUR 400,000. The system management activities are valued separately at EUR 200,000.

Method

Cost approach: rebuild cost EUR 283,000 (2,100 developer hours).

Income approach: relief-from-royalty range EUR 380,000 ? 502,000.

The chosen value of EUR 400,000 lies within both ranges.

Risks

The tax inspector may argue for a higher value at the top of the royalty range. The order volumes behind the royalty range have not been documented yet; doing so before 1 July 2026 is recommended.
